What is a Hi-Fi Prototype

Purpose

How to create Hi-Fi Prototypes

Tips and Tricks

What are Hi-Fi Prototypes?

A high-fidelity prototype is a computer-based interactive representation of the product in its closest resemblance to the final design in terms of details and functionality.

The hi-fi prototypes cover not only the user interface (UI) of the product in terms of visuals and aesthetics, but also the user experience (UX) aspects in terms of interactions, user flow and behaviour.

Why do we need Hi-Fi Prototypes?

Usability Testing

Getting the most out of the feedback can be done with a prototype that is closest to the final product in its detail and functionality.

Presentations & Pitches

To communicate the designs and functionalities of your product to your stakeholders.

Enhances Collaboration

The availability of interactive prototypes can improve the collaboration with developers as they will have a clearer idea on how the application should behave

Hi-Fi Prototyping Tools

There is a growing list of prototyping tools available for designers.

Some of the top mobile and web software prototyping tools currently in the industry are:

- Proto.io
- InVision
- Pixate
- Axure
- Principle
- Form
- Framer
- Adobe XD (previously known as Project Comet)

“Prototyping is the conversation
you have with your ideas”

“User-centered design starts with the user and ends with the user.”

Prototyping is a key step in the product design journey, but it's not the final destination.

Breadcrumbs

A “breadcrumb” (or “breadcrumb trail”) is a type of secondary navigation scheme that reveals the user’s location in a website or Web application.

The term comes from the Hansel and Gretel fairy tale in which the two little children drop breadcrumbs to form a trail back to their home.

Breadcrumbs

A Convenience Feature

User Convenience

Allows easy navigation for users

Reduces Clicks & takes less space

Briefly elaborate on what you want to discuss.

Don't use it for single level websites

that lack logical hierarchy or grouping of content

Secondary Navigation

Use them as optional aid for navigation

Suggestions

Task Flow – Unique and representative of your product

Aesthetics – Jo dikhta hai wahi bikta hai
#not everything but very important

Meet your TAs –
