

Interviews

*Converse like a talk show host,
think like a writer, understand
subtext like a psychiatrist, [and]
have an ear like a musician.*

Lawrence Grobel

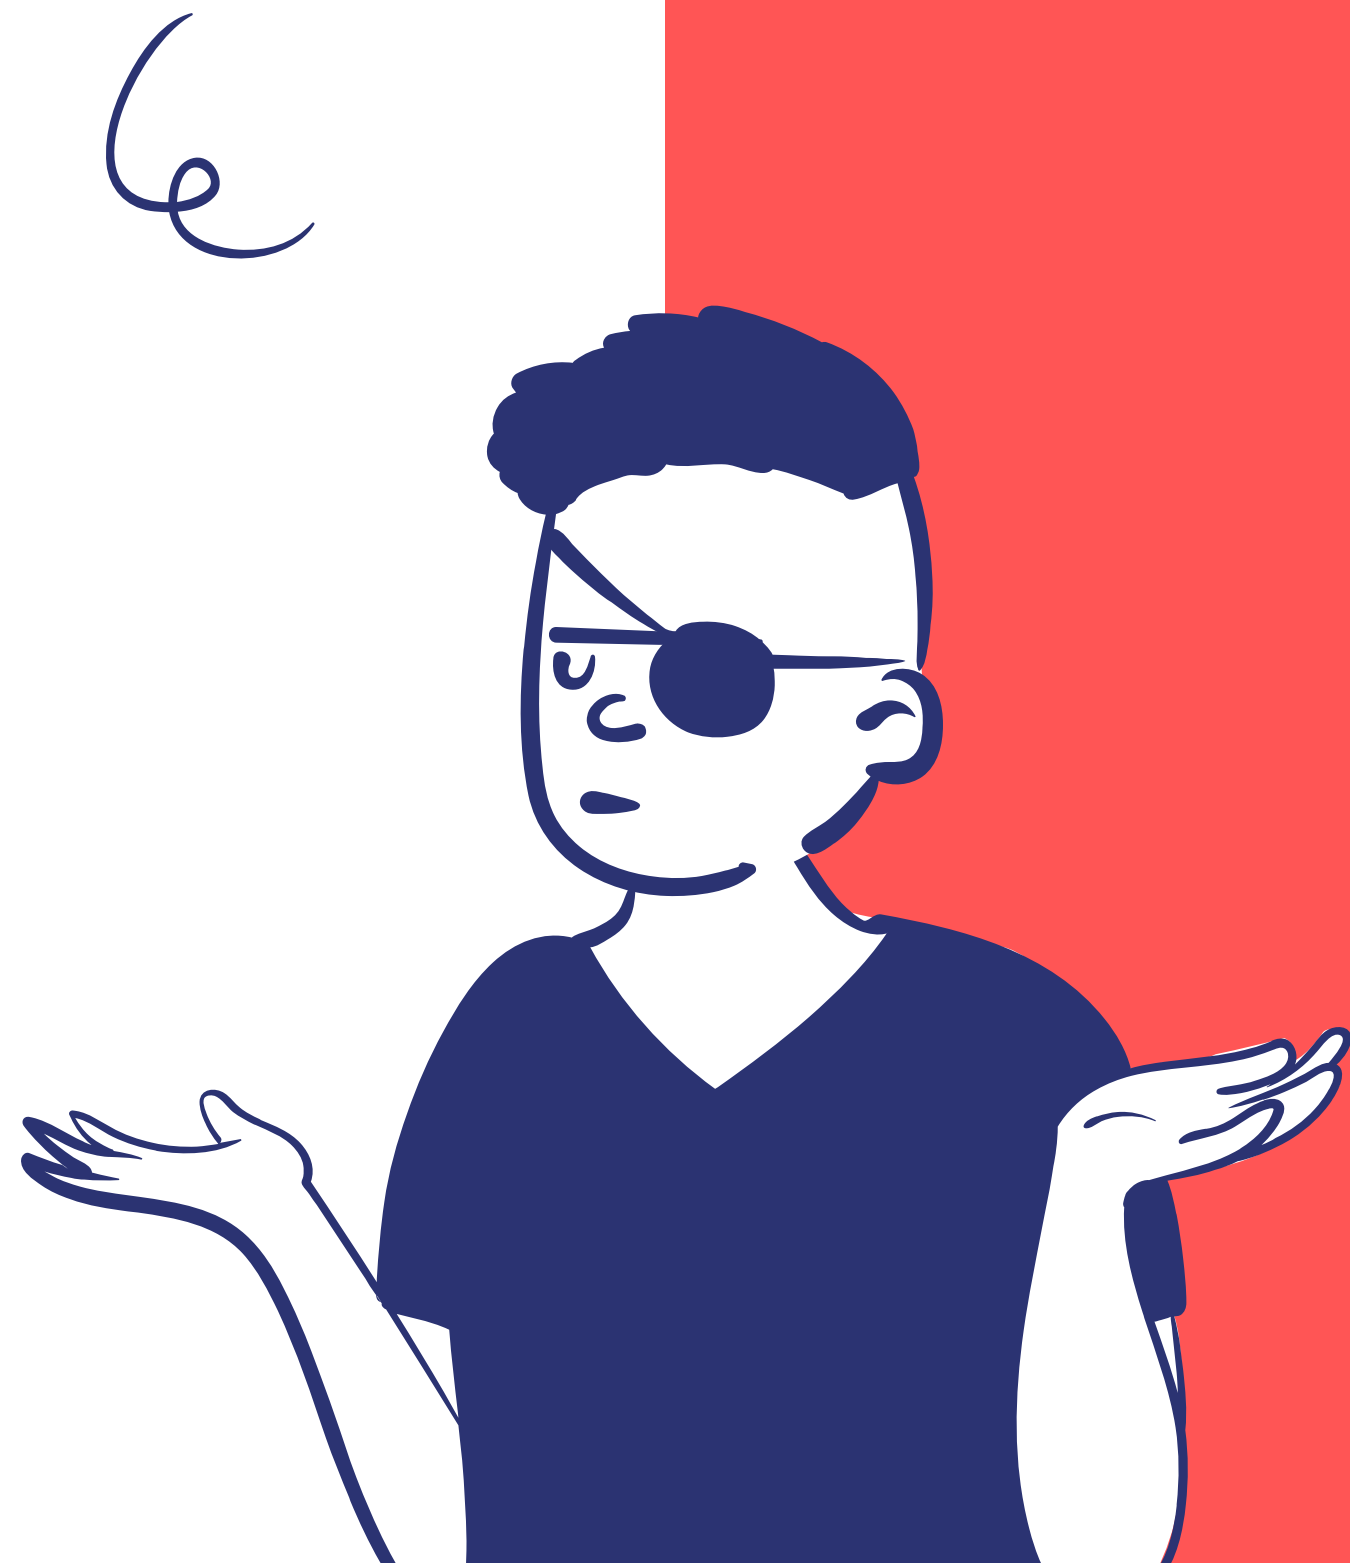

Interviews are one of the most straightforward user research methods, where you take time to chat one-on-one with a user or a potential user.

Why do we need interviews?

It is easy to fall in the trap of focussing only on creating prototypes and solutions to communicate the vision of the to-be experience.

But if the solution does not fit into the lives of the people it is meant to serve or if it doesn't consider the behavioral factors associated with the problem it's trying to solve.. will the prototype really fulfil its purpose?

Do user interviews when you need exploration

If you need insight into how others view your problem statement or if you need further exploration into the behaviors of your stakeholder group, user interviews are an efficient way to do that.

It gives you an option to ask back and respond to what the users have to share with an immediate feedback loop.

Pilot Study

"Small study to test research protocols, data collection instruments, sample recruitment strategies, and other research techniques in preparation for a larger study"

Why are pilot studies important?

"Conducted to identify potential problem areas and deficiencies in the research instruments and protocol prior to implementation during the full study. It can also help members of the research team become familiar with the procedures in the protocol, and can help them decide between two competing study methods, such as using interviews rather than a self-administered questionnaire"

Types Of Interviews

Structured Interviews

Semi Structured Interviews

Unstructured Interviews

Planning a User Interview

Consider the time and resources.

Choose a structure

User Recruitment

Conducting an Interview

- Introduce
- Warm Up

Main Body

- Wind down
- Closure

Tips and Tricks

Assignment 4

Submission Date: Saturday, 12th March 2022

Interview:

GROUP PROJECT:

Objectives:

- Plan and conduct a data gathering activity - Set a goal to what you need to inquire or investigate for your Final Project

4. Data Gathering/Collection:

- **Participant List**
1) Make a list of potential participants for the interviews, questionnaires, surveys, etc.
- **Consent Form**
2) Draft an appropriate Consent Form for the participants
- **Draft Questions**
3) Plan & develop the Interview Questions, Questionnaire Questions, Survey Questions, etc.
- **Conduct & Record the Data**
4) Conduct the different types of data collection methods and record it, ready for analysis

Moving Forward

If you found this interesting;
probably you'll explore further too.
Maybe? Maybe not? Who knows?

General Tips Moving Forward

01

1. Work Together
2. ENJOY working together
3. Adapt to others' and your needs
4. But stay TRUE to yourself
5. Work regularly

02

1. Meet your TAs regularly
2. Discuss and debate your thoughts, ideas and processes with your TAs.

IRB

Institutional Review Board

An IRB has the authority to approve, require modifications in (to secure approval), or disapprove research. This group review serves an important role in the protection of the rights and welfare of human research subjects.

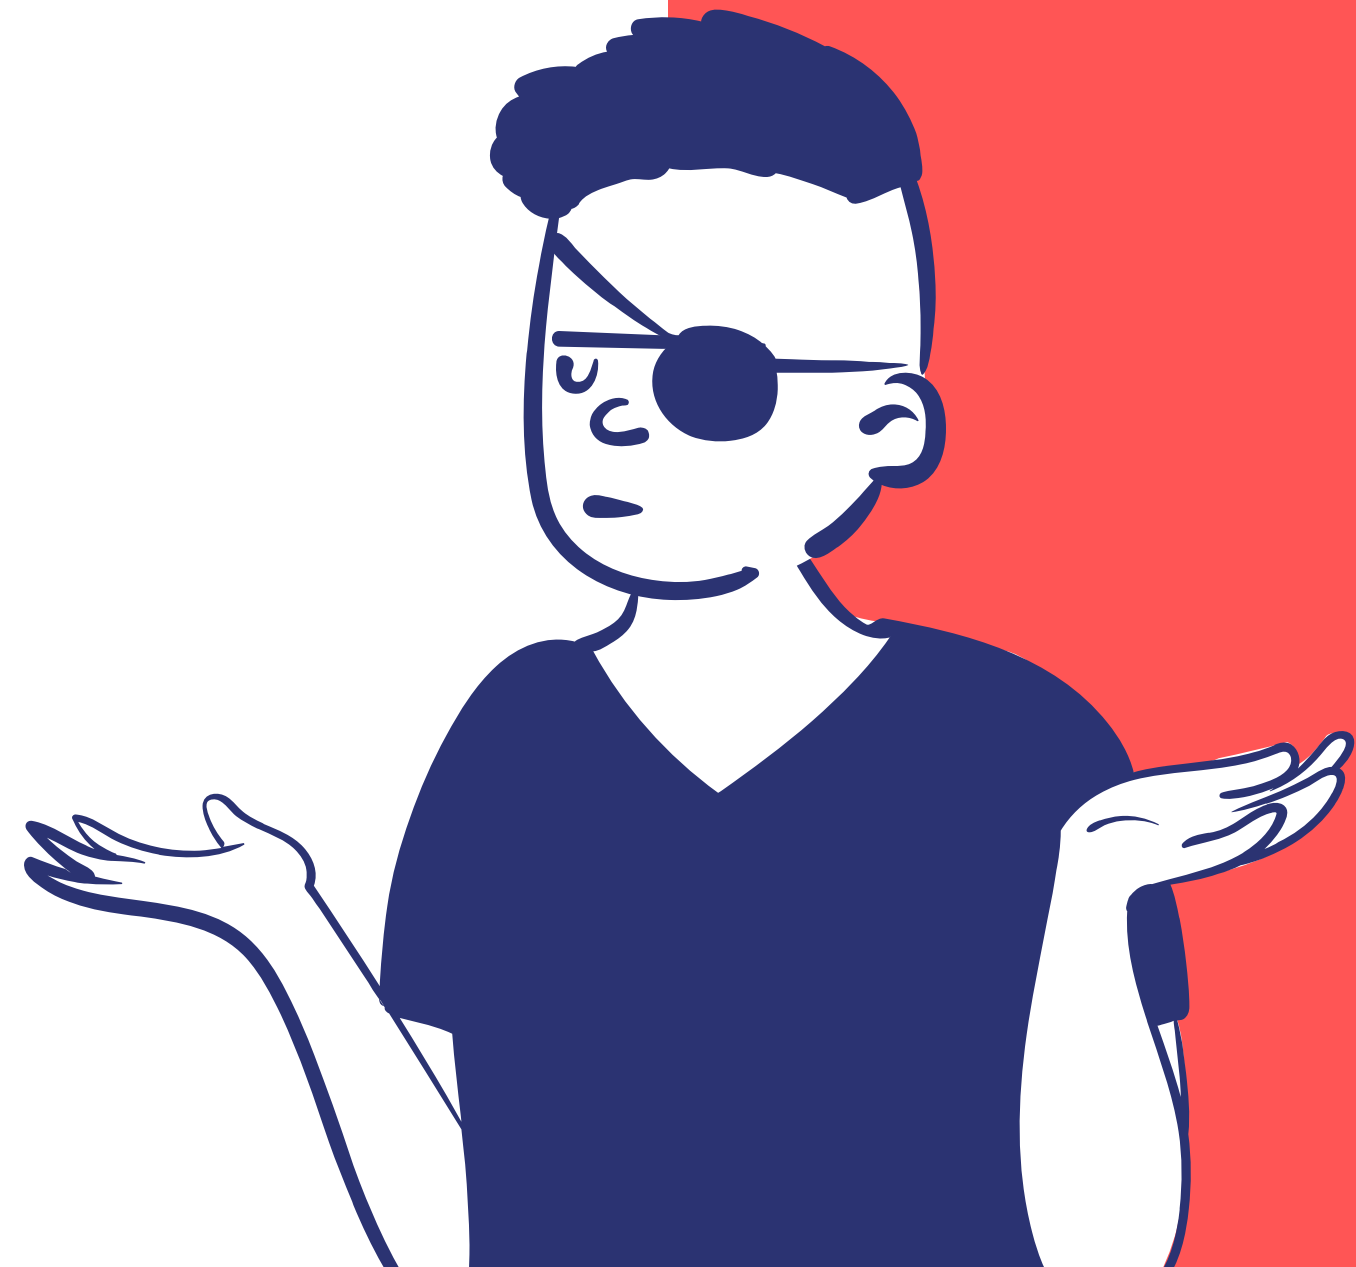

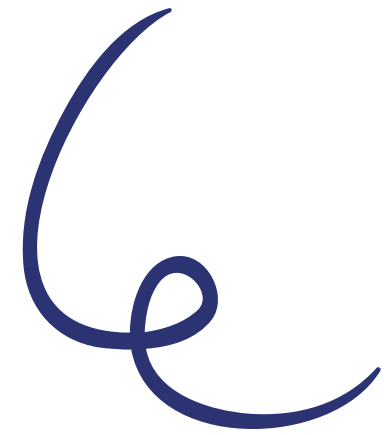

The purpose of IRB review is to assure, both in advance and by periodic review, that appropriate steps are taken to protect the rights and welfare of humans participating as subjects in the research.

Any Questions

Related to interviews or the course or IIITD or Life.

Appendix

Thanks to the template xD

01

Coming up with great questions while properly evaluating a stakeholder takes a lot of focus and preparation.

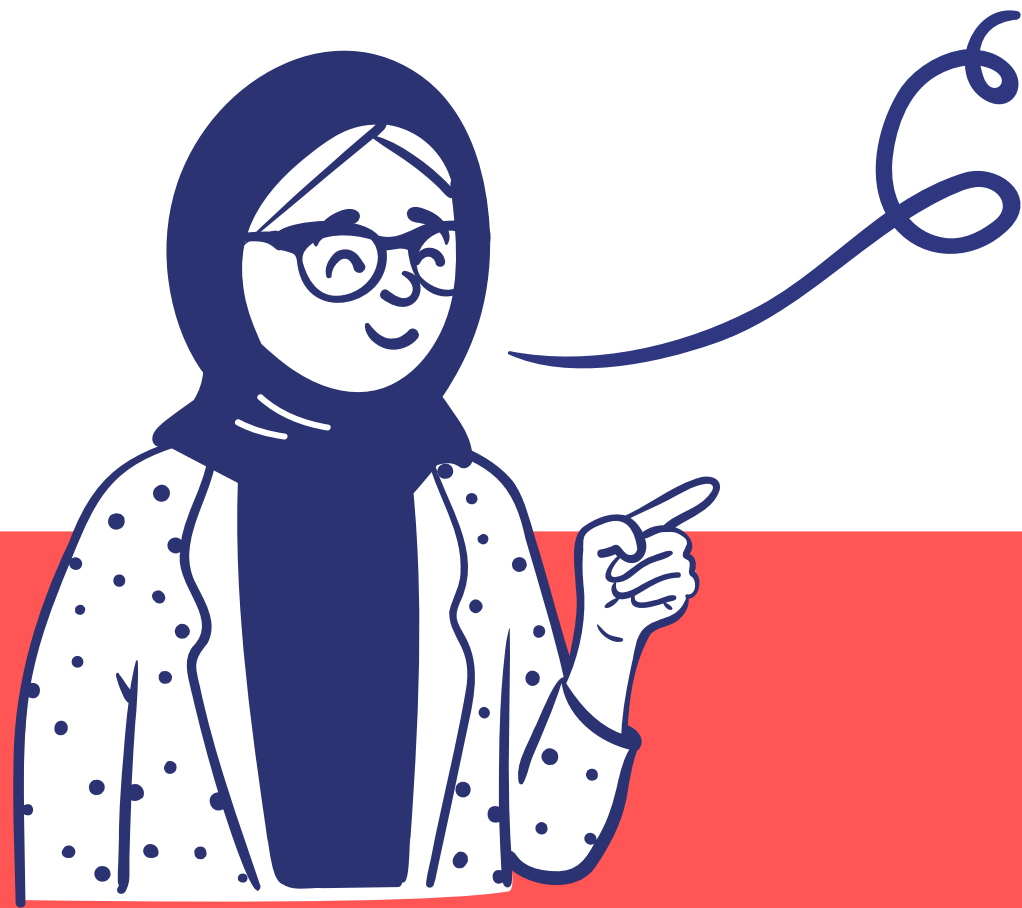

02

Learn which questions are able to draw out genuine responses from your interviewees.

03

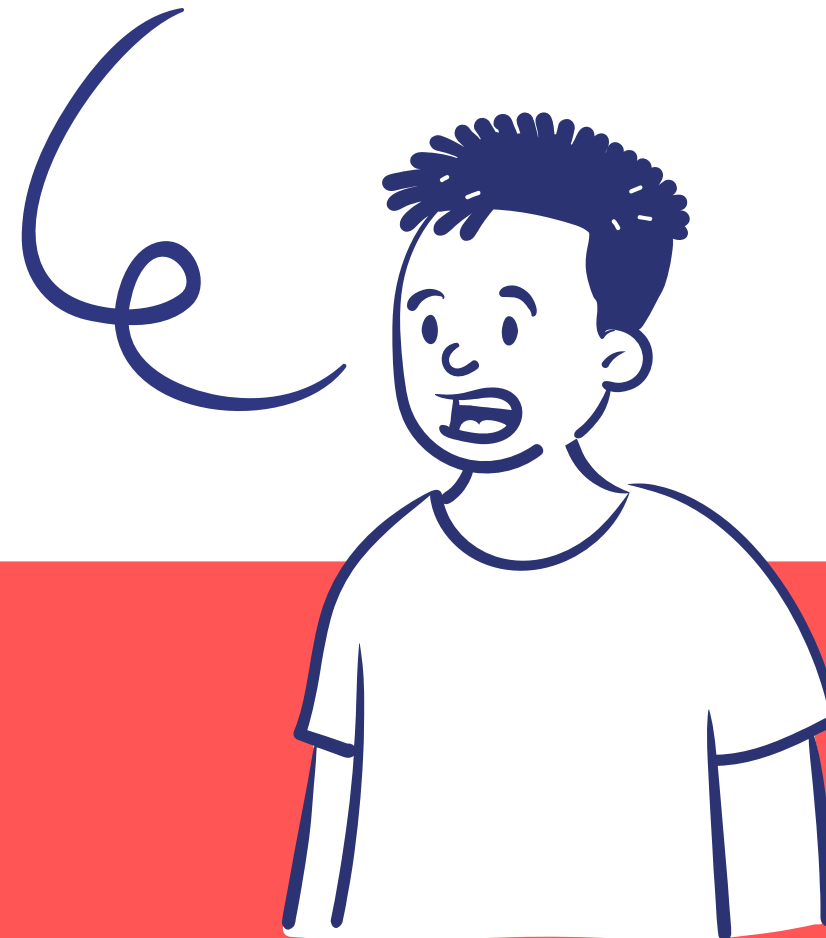

Put yourself in the position of the interviewee to see which of your questions are worth asking and which ones can be eliminated.

Hear them out.

Listen to them attentively and absorb their answers so that you can come up with a great follow up inquiry.

Be friendly.

Interviews are grueling enough. Lighten the mood by maintaining a warm tone and listening to your interviewee intently.
