AFFINITY DIAGRAMS

WHAT IS AFFINITY DIAGRAM

The Affinity Diagram is a method which can help you gather large amounts of data and organise them into groups or themes based on their relationships.

WHY IS IT IMPORTANT

- *It helps you make sense of the data you collected*
- *It helps you define a problem statement*
- *It helps you develop potential solutions for the problems*

EXAMPLES

PROBLEM STATEMENT

Increased screen time among students in the past few years escalated by the current situation of COVID 19, has led to individuals such as students, working professionals and many more to procrastinate, feeling demotivated, suffering from health problems such as body aches and bad eyesight and leading these stakeholders to feel as if they have lost structure to the day blurring the lines between their work and leisure time.

Shivam Arora

Age: 21 Years
Occupation: Student at IIITD

Hello Shivam, Do you feel any issue regarding time management?

Hello, Yes as our institute is also known for giving a lot of work apart from that i am doing a online data science course . Which makes it difficult to manage both things at the same time.

How do you plan your manage your deadlines and do you think organizing schedule works for you?

I wont lie, i honestly do my work very close to deadline, Yes definitely organizing schedule works for me but i procrastinate a lot so i fail to organize my schedule

Would you try to use app if its more user friendly and gamified at the same time so you can compete with others?

Yes, definitely if you can get of constant notifications and make it a bit fun then i am definitely interested

Do you use any time management app? If not are you willing to use it?

No, and i am not quite interested in using these app as at the end you have to manage it yourself and also these app keep on bugging people with reminders which make them feel pressured and a bit tensed

How would you rate your current experience with time management?

I procrastinate a lot and delay in doing my work so i would like to rate it in between 7-8.

Would you like use the app if it has a collaborative feature, like you can work in group and keep track of everyone?

Yes, certainly as i have a 2 projects going in parallel and i always problem have to cope with other members so the work gets completed on time.

Nikhil Arora

Age: 18 Years
Occupation: Engineering aspirant currently in Class 12

Do you feel that time management is an essential component of your lifestyle?

Since I am preparing for Board exams and JEE simultaneously, time management and staying disciplined is indeed very crucial to me.

How well do you cope with stress and time crunch during your preparation?

It gets pretty overwhelming and stressful nowadays since I have to take multiple mock tests along with giving the Practical Exams, making it difficult for me to manage time.

Could you tell some of the shortcomings you faced using those apps, if any.

One of the things I noticed was the tone of notifications. It was almost as if instead of motivating me to be productive, the app made me feel guilty whenever I drifted away from my schedule.

How do you prioritize your tasks?

I generally allocate time depending upon the schedule of the exams. I have my Practical exams going on and JEE coming up, I spend majority of time studying for these Practical exams while trying to revise some topics of JEE as well.

Have you tried out any time management apps?

I will not say that I am an experienced user when it comes to Time Management apps, but I did give a few of them a try for a few weeks.

What features do you think would help making such apps more useful and enjoyable?

Some motivating prompt to help me stick to my routine. Some feature which can enable group study would also be useful since I often solve practice questions with my friends.

Pulkit Goel

Age: 27 Years
Occupation: Working Professional

Hello Pulkit, how essential is time management in your life?

Ya, its really important for me currently as I am planning to switch to a different company, as a result I have to spare time for the preparation as well.

How do you manage your time and structure your day?

I have a diary in which I maintain a kind of to-do list and I do take work from that in increasing order of priority.

How is your current experience with time management?

I am able to manage my time well for the first half of the day but after returning home in my opinion, I waste a lot of time doing random stuff which leaves me with a very little time to prepare.

Had you ever tried to use time management apps?

I had tried using a lot of apps available but for me atleast they had not increased my productivity.

What are the things that you had not liked about these apps?

Most of them do not have a good user interface. The notifications that regularly come especially if I fail to complete a task somewhat annoys and irritates me.

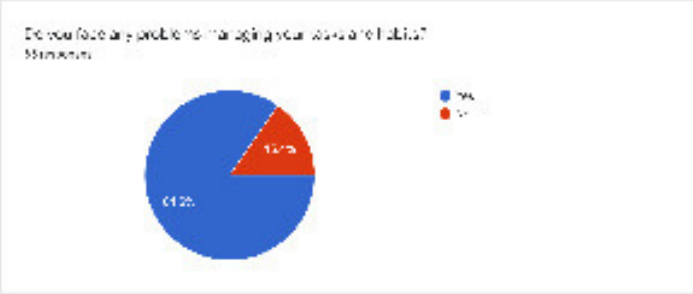

What are the features that you want in a time management app?

As you had told the idea of gamification to get your tasks completed seemed interesting to me and I would definitely want to try out such an app. Some prompts that can motivate me to start and complete my scheduled task would also be great. Different varieties of to-list shall be available for the user to choose from.

AFFINITY MAPPING - Time Management and Digital Productivity

WHAT WORKS?

USER EXPERIENCE OF PRESENT TIME MANAGEMENT APPS

It reminds me of
tasks to be on
time with a silent
alarm that helps
deal with stress

Calendar based
time division in
apps helps in
organized
working

collaborative
features so
one can work
with friends.

organised
schedule which
also allows me to
make changes
and add details to
any task

EFFICIENCY OF PRESENT TIME MANAGEMENT APPS

present way of time
management is writing
down time table, its
conventional and basic,
but offers
opportunities to
personalise

apps timely
alarms you
about your
work

organised
schedule which
also allows me to
make changes
and add details to
any task

WHAT DOES NOT WORK?

USER'S PROBLEMS

Poor time
management or a
slight slack can
have high stakes
like wasting the
whole day

Too many tasks
and poor
management
makes it difficult
to be very
productive

Poor work-
life balance

Lack of motivation
to do stuff and
relying on
external factors
like deadlines to
finish things

Struggles in
academics and
social
lives

Spending
more time on
doing less
important
stuff

Rushing to
finish things at
the eleventh
hour

Poor sense of
time- unable to
estimate time
required to finish
a particular task

USER EXPERIENCE OF PRESENT TIME MANAGEMENT APPS

present
applications
sometimes makes
one hate the tasks
themselves

The forceful
and insensitive
prompts are
very annoying

Sense of
dissatisfactio
n

Increased
levels of
stress

Lack of motivation
to do stuff and
relying on
external factors
like deadlines to
finish things

Poor sense of
time- unable to
estimate time
required to finish
a particular task

EFFICIENCY OF PRESENT TIME MANAGEMENT APPS

Failing to set
priorities to
tasks

Low
productivity
and efficiency

Poor
planning of
tasks

Present time
management
apps have very
bothersome
notification
system.

UI / UX

Applications
should be
more
engaging.

easy to use
especially
for a
layman

Less boring or
monotonous
interface. To
make it more
welcoming

More
personalized
experience

SUGGESTION

Engagement

Something that reminds
me by not just a text
message saying you missed
but something that can
actually trigger my sense
and I prefer not to miss it
again

Humane
and polite
notifications
in apps

Less
invasive and
user friendly
prompts.

Reminders over 6
hours about
schedule and
reminders for every
event atleast 30
mins early

Reminder prompts
for motivation,
gamified
experience, not
having to add
routine tasks again
and again

Features

different
fields for
different
types of tasks

keeping track of
where i spent
my time so i
could analyze it
better

A platform where user suggest
what to study and how long of
what I did in the past 12 days,
making sure that they get
learned. And if finished I come
on Monday, device app should
reiterate that it is suggested
after scheduling, reminder to
reduce fatigue

Social media App
blocker which can
stop the use of
social media apps
for a while (ex-
1hr, etc)

Different types of
to-do lists shall be
available to the
user to choose
from to prioritize
your work

I'd prefer an
organized schedule
which also allows
me to make changes
and add details to
any task

collaborative
features so
one can work
with friends.

Realtime Impact

emphasized
support on
developing
mentality to
achieve daily
goals consistently

encouraging
factor for
everytime you
achieve a new
personal best

Incentives
might
help

IMPROVED PROBLEM STATEMENT

Time management and productivity problems in daily life further aggravated by the pandemic has led to the line being blurred between professional and social life leading to stakeholders such as students, working professionals and otherwise to feel demotivated, confused, and lethargic

STORYBOARDS

WHAT IS STORYBOARDING

Storyboarding is a tool people use to visually predict and explore a user's experience with a product/service. It can also be used to further explain why the problem area we are considering is relevant.

WHY IS IT IMPORTANT

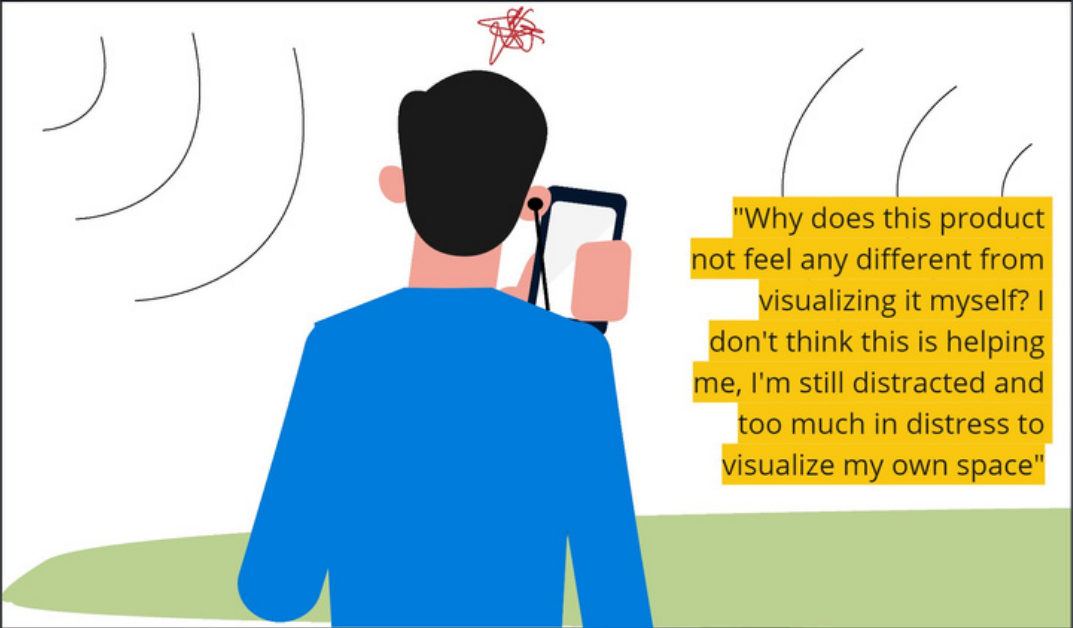

A storyboard will help you understand whether your concept will be viable to work or not. It also helps you visualise your words in the form of a story which makes it easier for people to understand what you are trying to convey.

EXAMPLES

PROBLEM STATEMENT

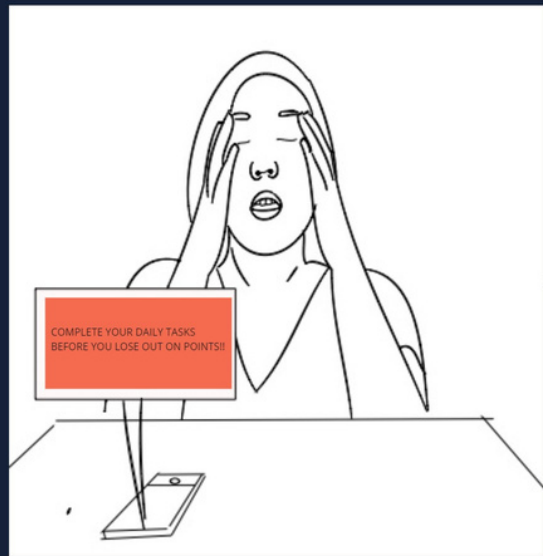

A safe space is an environment in which a person can feel at ease from episodes of anxiety or stress. A coping strategy commonly used is that of visualizing one's safe space. What if one could take it a step further than just visualizing a safe space and instead experience one? This would help the user immerse themselves in their safe space with much more ease

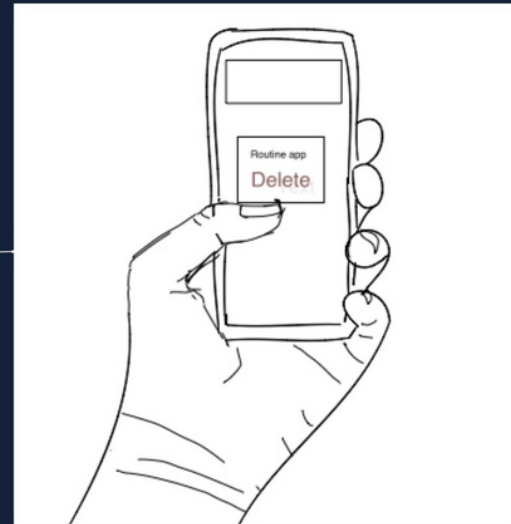

*What do you understand from the
storyboard that you just saw?*

PROBLEM STATEMENT

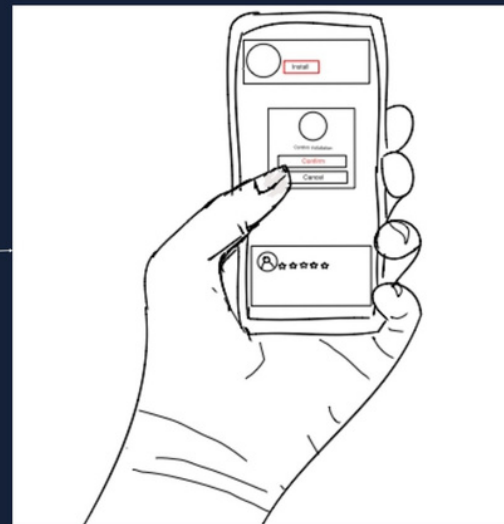

Time management and productivity problems in daily life further aggravated by the pandemic has led to the line being blurred between professional and social life leading to stakeholders such as students, working professionals and otherwise to feel demotivated, confused, and lethargic

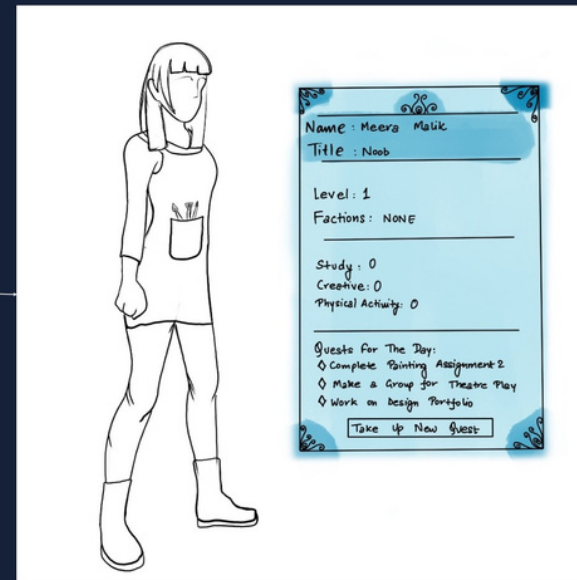

Meera is a frustrated by the inefficient time management app she currently uses.

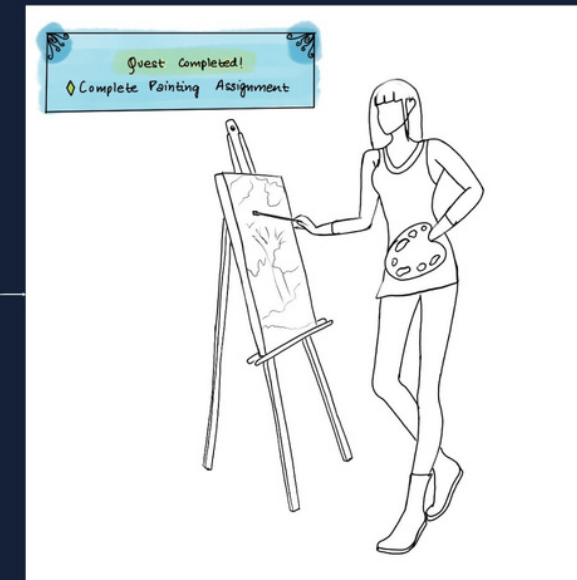

frustrated she deletes the app as it fails to provide her motivation.

she then downloads Suru.

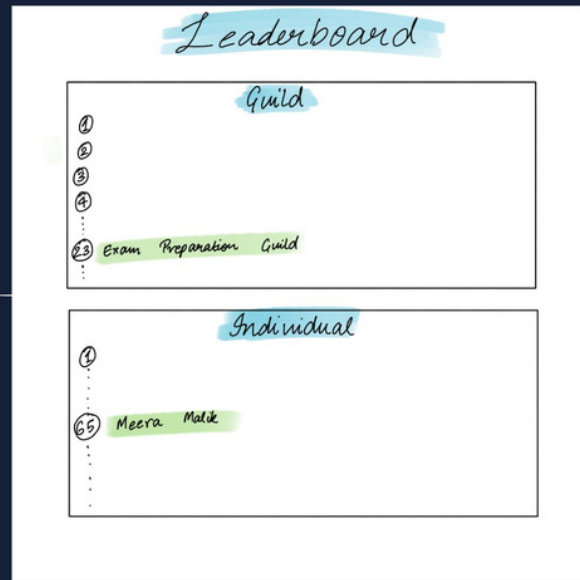

immediately she gets immersed in our world of avatars and assigns herself some quests (tasks) to complete for the day.

she then starts working on those quests. As and when she completes them, her skill points increase in different categories increase.

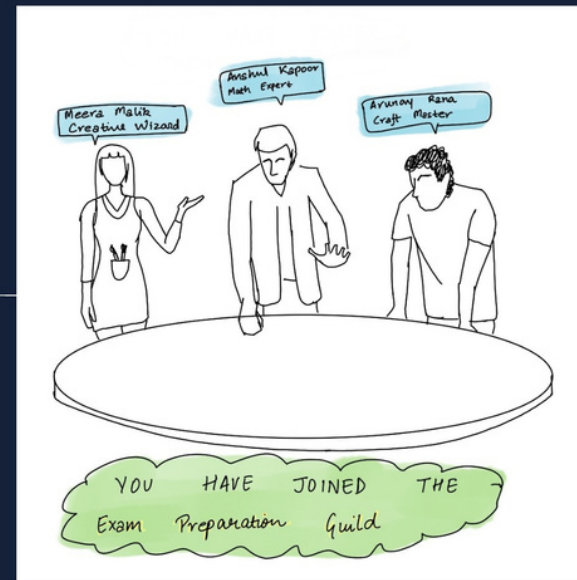

helpful prompts and positive messages are delivered via notification.

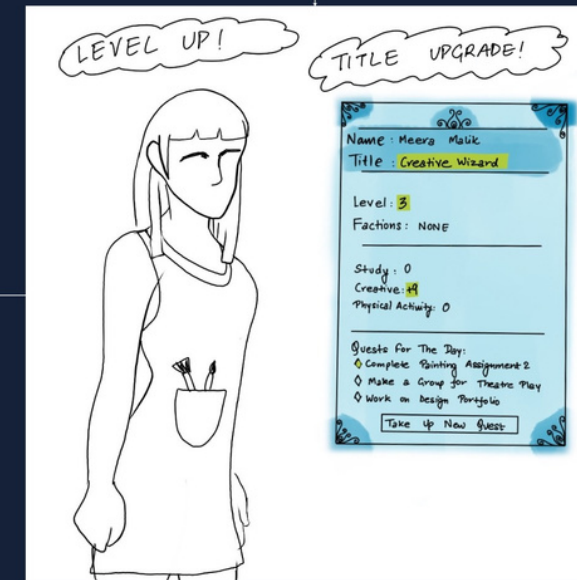

she further stays motivated and can check her progress on leaderboard.

a joint bulletin system helps them keep tabs on their joint and individual quests related to the project.

she is also able to form teams (guilds) with her friends to work and collaborate on projects.

she keeps a check on her stats, gets assigned various titles and levels up.

*What do you understand from the
storyboard that you just saw?*

PROBLEM STATEMENT

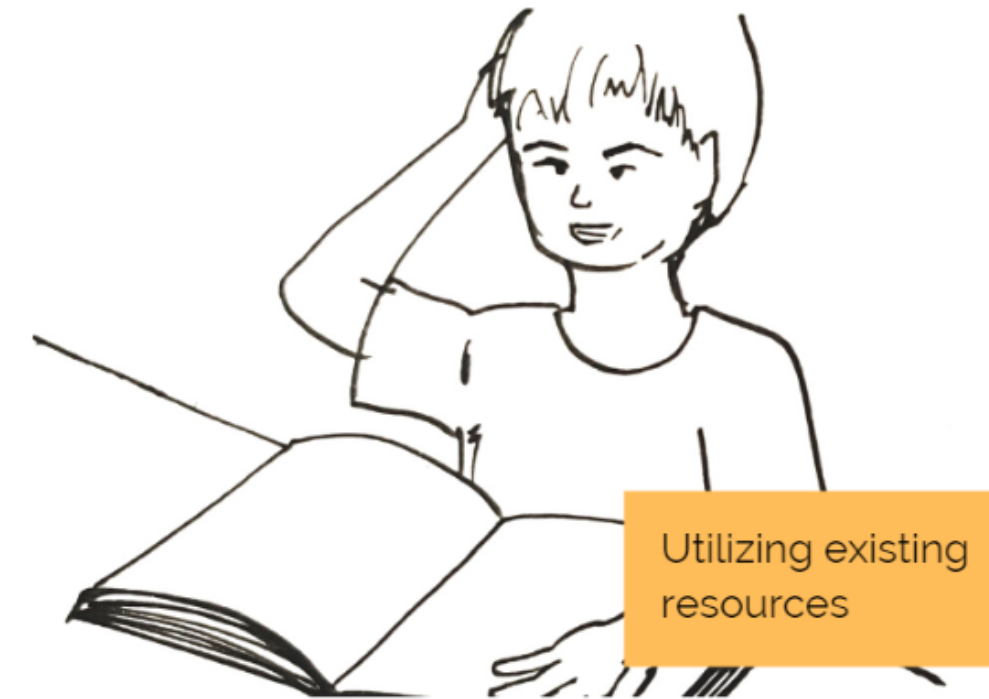

Our vast history and local traditions are getting lost in today's fast and urbanised lifestyles. People have little to no time to pay attention to the glories of our past. The younger generation has little to no knowledge of the local histories and traditions of their area.

NIRAN

Story Boarding

Aryan is a 16-year-old boy, living in Delhi. He has a great interest in history and local traditions, however, he rarely finds the history textbooks interesting and interactive.

Feels confused and irritated that he does not get to know interesting stories and facts about that place

Utilizing existing resources

1

Downloads and Opens the App

Aryan finds out about NIRAN and explores the application.

He feels hopeful that this application might help him know about various historical facts and stories in an interesting way.

2

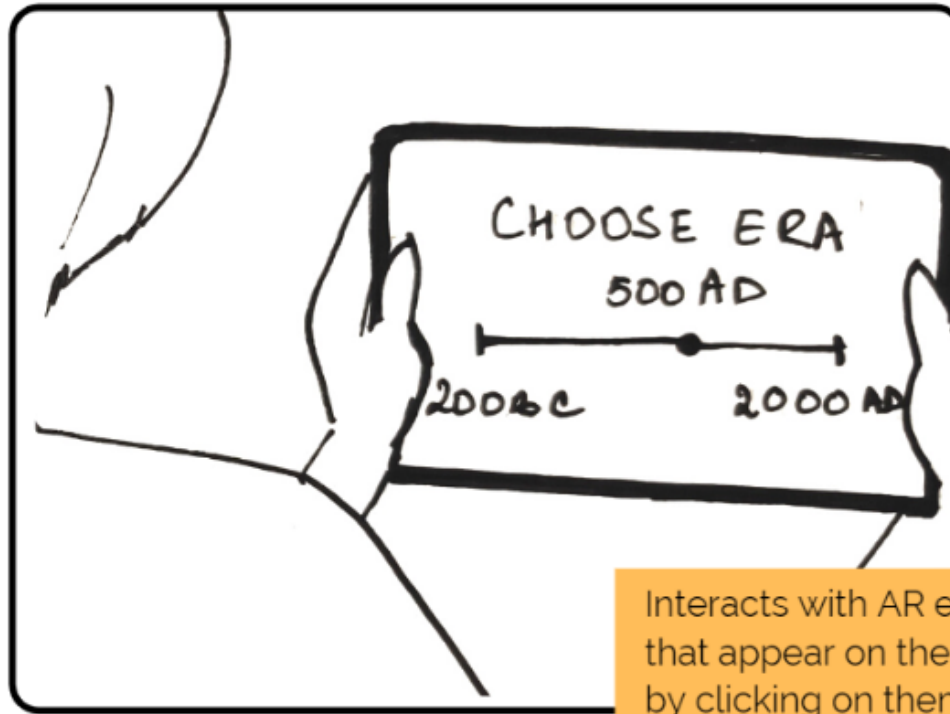

Turns on the Camera within the app

He uses NIRAN on his visit to the Taj Mahal. He decides to use the story walk option on the app.

Feels excited to see a number of checkpoints and hidden stories

3

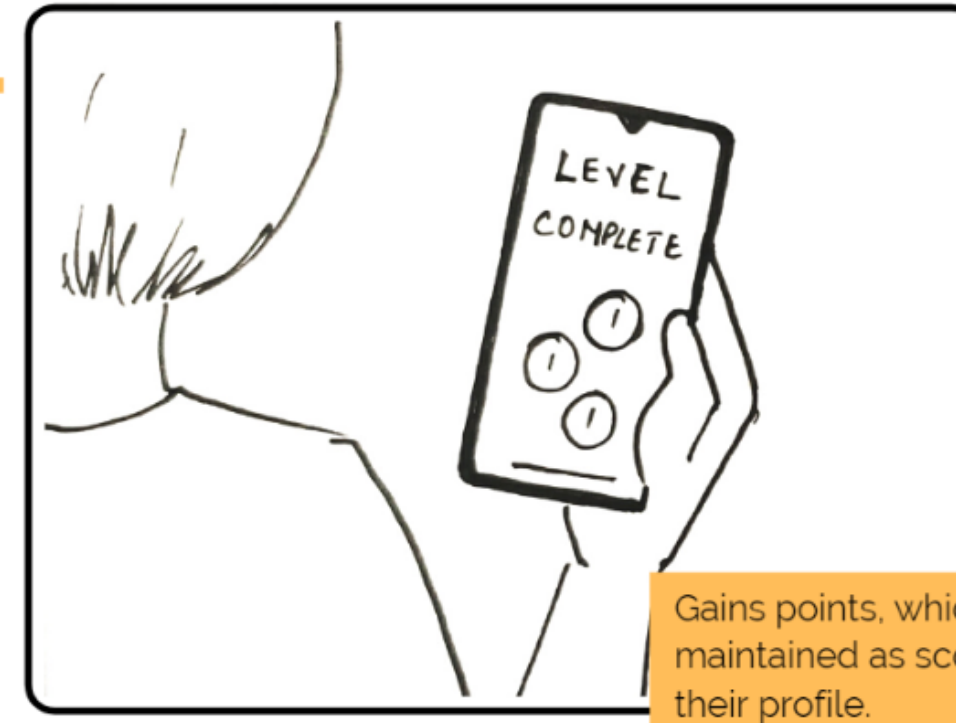

Interacts with AR elements that appear on their screen by clicking on them

He chooses an era (year) corresponding to which he wants to see stories.

Feels thrilled to know about these stories in a fun way.

4

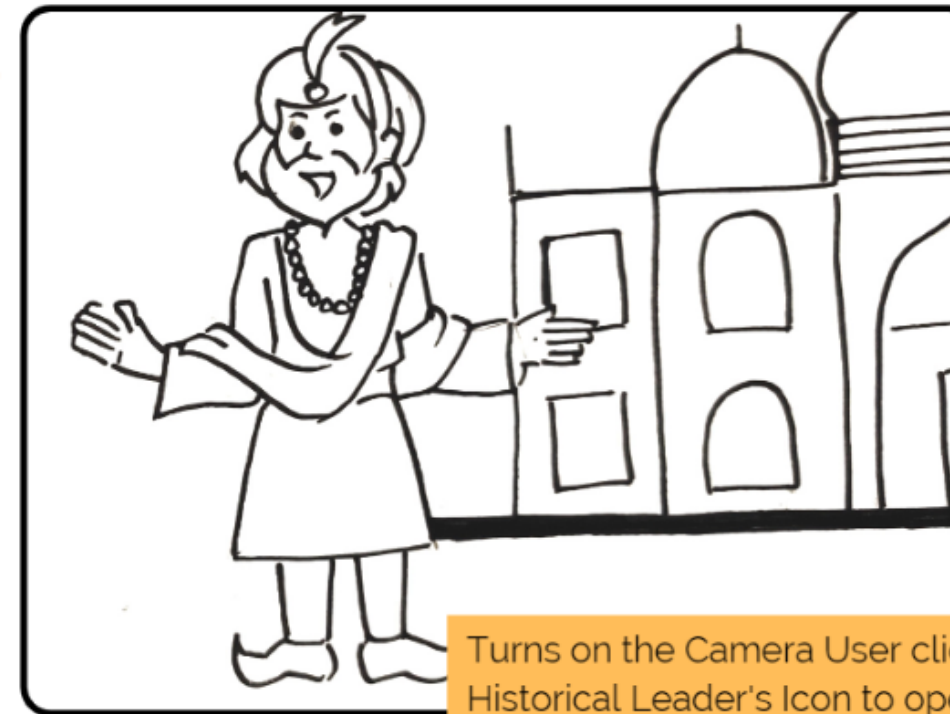

Gains points, which are maintained as score in their profile.

He gains points after scanning and moving through various checkpoints.

Feels motivated to gain points at each check point.

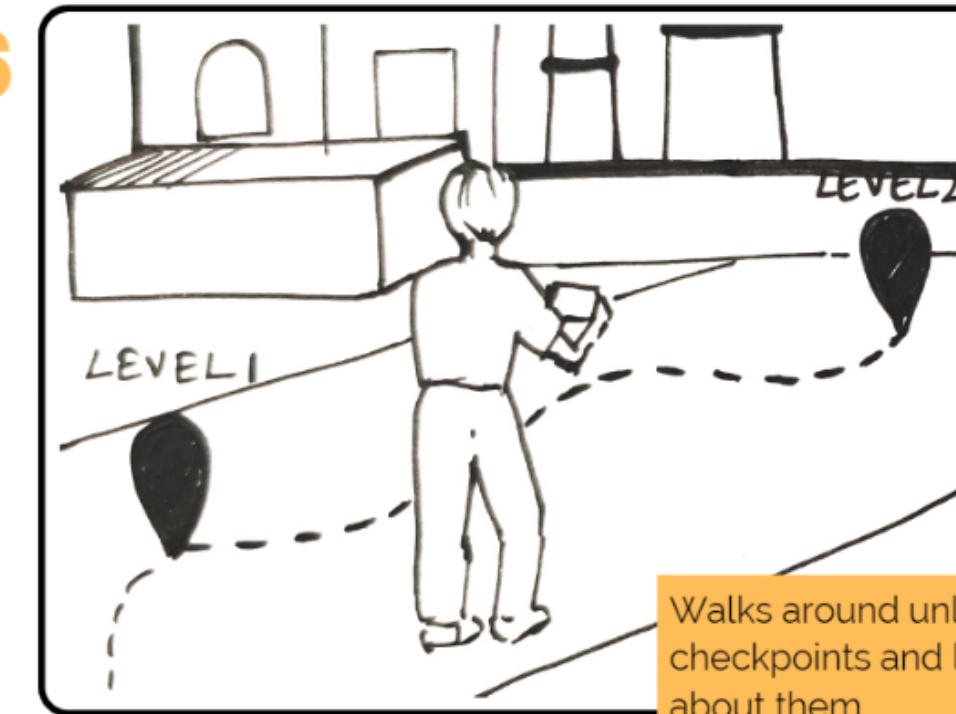

5

Turns on the Camera User clicks on the Historical Leader's Icon to open up the interaction with them within the app

Aryan also gets to have a chat with Shah Jahan.

6

Walks around unlocking checkpoints and learning about them

Aryan moves from one checkpoint to another as he goes on unlocking new levels and gaining points. He continues this till the storywalk is complete.

*What do you understand from the
storyboard that you just saw?*

THANK YOU
