CW_{max} 1024

MAC layer

I can't transmit this packet

it moves

on to the next packet

TCP

RTT → when you transmit a packet vs when you receive the ACK

is highly variable -

TCP timeout $\rightarrow$ value $f(RTT)$

$RTT = 100ms$

time $f(100)$ $300ms$

next RTT $500ms$
