

Installing NS-3

Installation of NS-3

- Go to: <https://www.nsnam.org/releases/ns-3-30/download/> and download: `ns-allinone-3.30.1` in the home terminal
- Or, download directly and follow the instructions (the download instructions are also mentioned in <https://www.nsnam.org/docs/release/3.30/tutorial/ns-3-tutorial.pdf>):

```
$ cd home
```

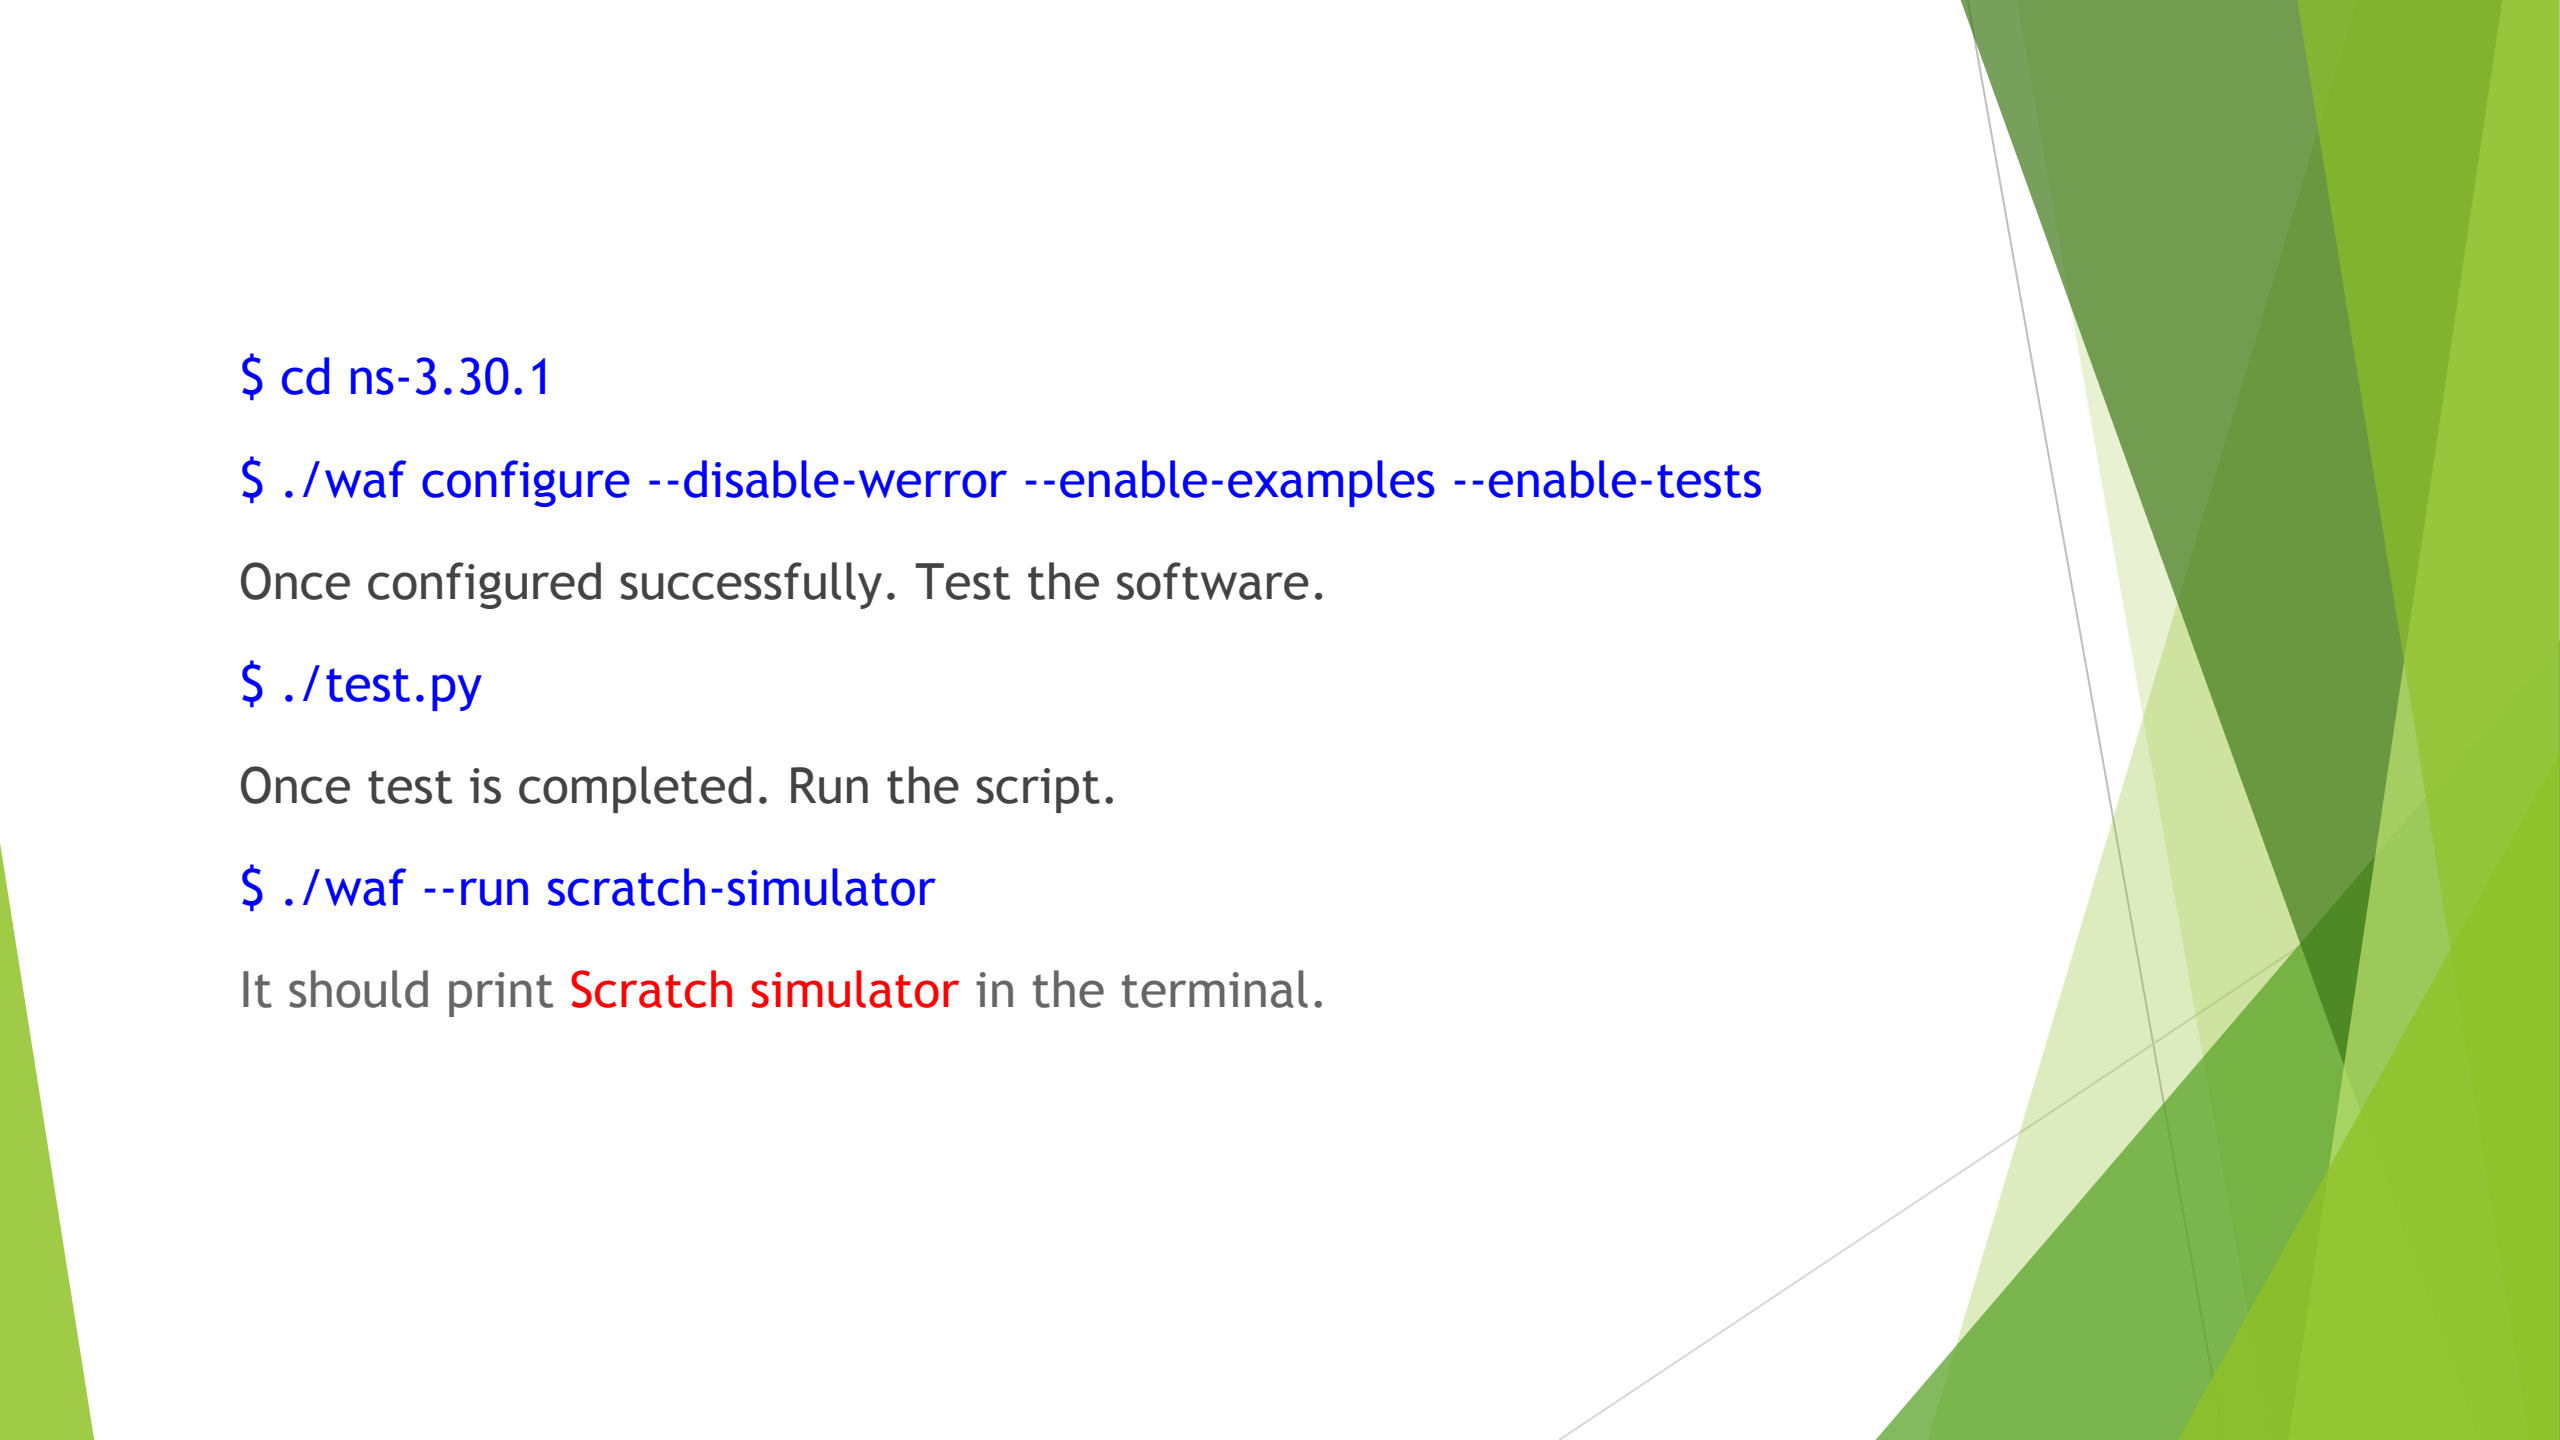

```
$ wget https://www.nsnam.org/release/ns-allinone-3.30.tar.bz2
```

```
$ tar xjf ns-allinone-3.30.tar.bz2
```

```
$ cd ns-allinone-3.30
```

```
$ ./build.py --enable-examples --enable-tests
```

Once the modules are build, we will configure NS-3

```
$ cd ns-3.30.1
```

```
$ ./waf configure --disable-werror --enable-examples --enable-tests
```

Once configured successfully. Test the software.

```
$ ./test.py
```

Once test is completed. Run the script.

```
$ ./waf --run scratch-simulator
```

It should print **Scratch simulator** in the terminal.
