

Leader :

```
L1 = [int(x) for x in input().split()]

L2 = [max(L1[:i]) for i in range(1, len(L1) + 1)]

print(*L2)
```

Help Jane :

```
def checkSimilar(x,y):
    if len(x) != len(y):
        return False
    dic = {}
    for i in range(len(x)):
        xx = x[i]
        yy = y[i]
        if(xx in dic.keys()):
            if(dic[xx] != yy):
                return False
        else :
            dic[xx] = yy
    return True

if __name__ == "__main__":
    x = input()
    y = input()
    if checkSimilar(x,y):
        print("YES")
    else:
        print("NO")
```

Minimum moves :

```
n = int(input())
dic = {}
x = [int(x) for x in input().split(" ")]
mx = 0
for y in x:
    if y in dic.keys():
        dic[y] += 1
    else :
        dic[y] = 1
    mx = max(mx, dic[y])
print(n - mx)
```

Order ascending :

```
n=int(input())
num1=[int(x) for x in input().split()]
num2=[int(x) for x in input().split()]
list1=num1.copy()
list2=num2.copy()
num1.sort(reverse=True)
num2.sort(reverse=True)
new=[]
if len(num1)==len(num2):
    for i in range(len(num1)):
        element=list1[i]
        index=num1.index(element)
        element2=num2[index]
        new.append(element2)
    for i in new:
        print(i,end=' ')
```

Sam's game :

```
w = input().split()
res = 0
```

```

while True:
    a = w[0][-1]
    flag = True
    for i,s in enumerate(w):
        if len(s) == 0 or s[-1] != a:
            flag = False
            break
        w[i] = w[i][:-1]
    if not flag:
        break
    res += 1
    if len(w[0]) == 0:
        break

print(res)

```

Border patrol :

```

def fourth(l,n,m):
    rowstart=0
    rowend=n-1
    colstart=0
    colend=m-1
    x=0
    while colstart<colend and rowstart<rowend and x==0:
        for i in range(colstart,colend+1):
            print(l[rowstart][i],end=" ")
        rowstart+=1
        for i in range(rowstart,rowend+1):
            print(l[i][colend],end=" ")
        colend-=1
        for i in range(colend,colstart-1,-1):
