

Unique ID :

```
list1 = [x for x in input().split()]

n = int(input())
list2 = list()

for pos in range(len(list1)):
    s = ""
    if len(list1[pos])>n:
        s = list1[pos][:n]+str(pos+1)

    else:
        s = list1[pos]+str(pos+1)

    list2.append(s)

print(' '.join(list2))
```

Special numbers :

```
L=[int(i) for i in input().split()]
x=int(input())
L.sort()
if x in L:
    print(L.index(x))
else:
    L.append(x)
    L.sort()
    print(L.index(x))
```

Team formation :

```
arr1 = [i for i in input().split()]
```

```

arr2 = [i for i in input().split()]
n = len(arr1)
for i in range(n):
    print('%i. %s %s' %(i + 1, arr1[i], arr2[i]))

```

Either here or There!! :

```

list1 = [x for x in input().split()]
list2 = [y for y in input().split()]

set1 = set(list1)
set2 = set(list2)

list3 = list(set1.intersection(set2))

if len(list3)==0:
    print("No common students")
else:
    l = list()
    for ele in list1:
        if ele in list3:
            l.append(ele)

    print(' '.join(l))
    print(len(list3))

```

Sam got a new Challenge :

```

n = int(input())
lst = [int(x) for x in input().split(" ")]
dic = {}
for x in lst:
    if x in dic.keys():
        dic[x] +=1
    else :

```

```
dic[x] = 1;
ans = -1;
for i in range(n):
    if(dic[lst[i]]==1):
        ans = i
        break
print(ans)
```

Zero to centre :

```
n = int(input())
lst = []
x = -1
y = -1;
for i in range(n):
    ll = input().split(" ");
    lst.append(ll)
for i in range(n):
    for j in range(n):
        if lst[i][j]=='0':
            x = i;
            y = j;

ans = abs(x - n//2) + abs(y-n//2)
print(ans)
```
